Colour Smart Solutions Testimonial

Melissa Goldring, Office Manager

I would gladly recommend Colour Smart Solutions to anyone looking for a cost effective printing solution. They provide second to none printing solutions to our small practice and what stands out for me is their willingness to tailor to our specific needs.

For many years we had been looking for a printing solution that fit our specific requirements but in the end we always bought our printers and toners outright because we were never happy with their recommendations or pricing. Finding Colour Smart Solutions changed that, they actually listened to exactly what we were after and provided us with a solution to match that, even better, at hard to beat rates. We now have a hassle free set up without having to worry about problems with our printers or remembering to order toners.

Bryan Murphy and his team are very responsive to any request, they always deal with us in a professional and courteous manner, they are always reliable and willing to go that extra step to make sure we have all of our needs met. Customer service is the basis for any business no matter what industry you're in and Colour Smart Solutions displays this to the highest standard. If you have a problem, they will find a solution.

It is always a pleasure dealing with Colour Smart Solutions and I highly recommend them without any hesitation.
