To whom it may concern,

I approached Colour Smart Solutions because we required a solution to help us to automate the collection of data from our on-site project job sheets and automatically input it into our system for the purpose of efficient and accurate billing.

Colour Smart Solutions helped me by taking the time to fully understand what it was we wanted to achieve and then recommend a complete solutions that allowed us to complete this task effortlessly.

The result was we now have a simple and accurate solution that prints out our job sheets, and then scans our teams signed job sheets after the job has been completed and automatically saves and uploads the required data to enable us to bill our jobs accurately and in a faster manner.

One thing I liked was their willingness to understand what it was that we required and to suggest the solution to match our needs.

I found the experience easy. Bryan was always dressed immaculately, available and was proactive with advice.

I would recommend Colour Smart Solutions to people who need a print or scan solution, and want to be looked after by a company that is interested in understanding what they need and providing great back up service.

Kind regards,

Andrew Bodman
