Sub: SpanSet Testimonial

I approached Colour Smart Solutions because we were looking for alternate supplier for our printing solutions and Bryan assists us in saving printing cost for our offices in the state of QLD and VIC.

I met Bryan Murphy of Colour Smart Solutions during printer supplier review process and Bryan has provided very professional service and has always been open and honest during the discussions. For our small operations in QLD and VIC Colour Smart Solutions helped us choose the right printing solution for QLD and VIC offices and our staffs are happy with the solution.

From beginning Bryan Murphy was very clear in his conversation about the cost and benefits that has been offered to us and this clarity we did not see in other printer suppliers or their representatives. The whole experience from contract signing till installation and commissioning of printers was good.

I would recommend Colour Smart Solutions to people who need to save money and have a professional service to meet their printing solutions.
