I have been working with Bryan for over 10 years now and when he originated Colour Smart over two and a half years ago it coincided with a rapid expansion of our business. This expansion required us to totally re-engineer our printing and document management systems

The Colour Smart team offered a highly consultative and professional approach to assessing our needs. They have a very broad knowledge of potential solutions and they implemented a system which, I felt, was in our best interests. We have been delighted with an efficient, reliable and effective system that does everything we need with the minimum of fuss.

The follow up service from the broader Colour Smart team has been equally hassle free and the communication is proactive and questions are solved quickly.

In general I have found Colour Smart to be a knowledgeable business partner who have helped us as we have grown and developed our business. Their technical knowledge is matched with a down to earth and friendly sales and post-sales service.

Regards

Dave McKillop
Managing Director
